About the workshop

The aim of this event is to provide delegates with an overview of an intensive group approach for working with complex OCD. It is primarily suitable for CBT therapists who have experience of working with OCD.

We will briefly explore: the theoretical and practical aspects of offering group based intensive therapy for OCD, making the most of the group environment to enhance individual learning and support, and the challenges and advantages of a group approach.

This will be an interactive discussion involving case examples.

This is a free event but places are limited to 25 so you will need to register beforehand.

To register, and for any event queries, please email - east-midlands@babcp.com

A CPD certificate will be provided for 1.5 hours CPD.
